

Beth Shields Middle School STEM Event

24 April 2023

Event Outcomes

SOFWERX hosted Hillsborough County Public School's Beth Shields Middle School for a STEM Event. During this event, students were given a SOFWERX brief and tour of the facility. Students learned soldering basics and how they can implement that knowledge into career paths and future aspirations.

- SOFWERX staff taught 32 students and 3 staff members from Beth Shields Middle School the fundamentals of soldering, with a hands-on activity to test their skills.
- This event allowed the students to have a dynamic real-world experience and an opportunity to connect with working professionals and learn about how careers in STEM could benefit them in the future.
