DOD TWO STEP AUTHENTICATION – NCAISS AND NISS

National Industrial Security Program Contracts Classification System (NCAISS)

The DCSA NCAISS Portal is a web-based application that provides Public Key Infrastructure (PKI)-based authentication services to DCSA applications and information systems for authorized users. Through the NCAISS Portal, an authorized user can access their DCSA NCAISS Portal account via a single signon (SSO) capability using PKI certificates (either a Common Access Card (CAC) or DoD-approved External Certification Authority (ECA) certificate).

National Industrial Security System (NISS)

DCSA System of Record for industrial security oversight accessible by Industry, Government, and DCSA personnel. FCL Sponsorship Requests will be made in this system. Once submitted, the FCL Request will be tasked to DCSA Facility Clearance Branch for review. During the review, DCSA VTU will validate the bona fide need to access classified information in the performance of a classified contract and ensure that the request meets policy requirements.
