Hardware Enabled AI Acceleration Assessment Event (AE)

06-07 January 2026

Event Outcomes

SOFWERX, in collaboration with USSOCOM J24 Intelligence Data Science Team (IDST), hosted an Assessment Event (AE) to determine the best solution to upgrade a remote location with high-performance Graphics Processing Unit (GPU) servers to support large language model (LLM) workloads for up to 100+ concurrent users. The system will be fully turnkey, including all GPUs, memory, storage, networking, cooling, and power infrastructure, ready for immediate operation. This configuration ensures fast, reliable Artificial Intelligence (AI) performance today and scalability for future growth.

- 44 Industry participants from 13 organizations presented their technology briefs to the Government team
- Out of 69 submissions, 13 capabilities were selected to brief
- A team of 5 USSOCOM and other government representatives participated virtually and in-person to listen to briefs and have one-on-one conversations with Industry
- USSOCOM will make their decision as to which organizations they will choose to move forward with in the coming weeks
