

# PEO-TIS Handheld High Frequency Radio Industry Day

03 March 2026

Event Outcomes

SOFWERX, in collaboration with USSOCOM Program Executive Office Tactical Information Systems (PEO-TIS), hosted an Industry Day to gain a better understanding of the current market and the technical capabilities of Handheld High Frequency (HF) Radio systems.

- Industry participants from 7 organizations presented their technology briefs to the Government team
- Out of 42 submissions, 7 capabilities were selected to participate
- A team of 18 USSOCOM and other government representatives participated virtually and in-person
- This event sought information on handheld HF radios that are currently available or could be readily adapted to meet USSOCOM's operational requirements. After meeting with the companies one-on-one, the stakeholders walked away with a better understanding of what is in the possible for this topic area.
