

PEO-TIS Warfighter Radio Industry Day

11-13 August 2026

SOFWERX, in collaboration with USSOCOM Program Executive Office Tactical Information Systems (PEO-TIS), hosted an Industry Day to gain a better understanding of the current market and the technical capabilities of a Key Leader Radio (KLR), an Intra Team Radio (ITR), and a Team Networking Device (TND). This effort was for informational and planning purposes only and does not constitute a Request for Proposal (RFP).

Event Outcomes

- 49 Industry participants from 17 organizations presented their technology briefs to the Government team
- Out of 61 submissions, 17 capabilities were selected to brief
- A team of 18 USSOCOM and other government representatives participated virtually and in-person to listen to briefs and have one-on-one conversations with Industry
- This event sought information on Key Leader Radio (KLR), an Intra Team Radio (ITR), and a Team Networking Device (TND) that are currently available or could be readily adapted to meet USSOCOM's operational requirements. After meeting with the companies one-on-one, the stakeholders walked away with a better understanding of what is in the possible for this topic area.
