

# Performance Monitoring Wearables Industry Demonstration Day

02-04 April 2024

SOFWERX, in collaboration with the Navy Special Warfare Center (NSWCEN), hosted an Industry Day to allow potential vendors to demonstrate physiological monitoring capabilities. These engagements with Industry helped NSWCEN identify potential material solutions. NSWCEN's intent was to survey industry for mature, non-developmental, technology that may support rapid fielding of this capability.

## Event Outcomes

- 23 Industry participants from 13 organizations presented their technology to the Government team
- Out of 49 submissions, 11 capabilities were selected to present
- A team of 20 Government representatives had one-on-one conversations with Industry
