

Pincrest Academy STEAM Night

15 January 2026

Event Outcomes

SOFWERX hosted a booth at the Pincrest Academy STEAM Night, engaging elementary, middle, and high school students and their families through immersive, hands-on activities centered on science, technology, engineering, arts, and mathematics (STEAM). Attendees participated in a collaborative Minute Math challenge and explored real-world aviation and engineering concepts through an interactive flight simulator. In addition to technical engagement, the presence of SOFWERX staff with prior military service provided students and families with direct insight into service-driven innovation and leadership pathways. These activities supported the missions of the United States Special Operations Command (USSOCOM) and SOFWERX by fostering curiosity, problem-solving skills, and awareness of future opportunities in STEM and STEAM-related fields.

- SOFWERX staff facilitated hands-on STEAM demonstrations that encouraged critical thinking, teamwork, and applied problem-solving through interactive challenges designed for a wide range of age groups
- The event enabled meaningful engagement between SOFWERX personnel and families, highlighting educational pathways, service-informed career experiences, and innovation opportunities aligned with USSOCOM's mission focus
