

Pinecrest Academy STEAM Night

30 April 2026

Event Outcomes

SOFWERX participated in Pinecrest Academy's STEAM Night on 30 April 2026, engaging elementary and middle school students and their families through interactive demonstrations and applied technology experiences. The event provided a community-focused environment where attendees explored science, engineering, and innovation concepts, reinforcing connections between classroom learning and real-world problem-solving. These efforts aligned with the missions of the United States Special Operations Command (USSOCOM) and SOFWERX.

- SOFWERX staff facilitated hands-on demonstrations, including technology displays and simulation-based interactions, introducing students to emerging technologies while encouraging curiosity, exploration, and active participation in STEM learning.
- During the event, students and families engaged directly with SOFWERX staff, creating opportunities to discuss STEM pathways, innovation, and real-world applications in an accessible, community-driven setting.
- SOFWERX maintained a strong and visible presence throughout the event, strengthening community partnerships and expanding awareness of SOFWERX's role in supporting STEM education, innovation, and future workforce development.
