

Quantum Computing, Sensing and Communications Gov and National Labs Only Collaboration Event

03-04 March 2026

SOFWERX, in collaboration with USSOCOM Science and Technology Directorate, hosted a Government and National Labs Only Collaboration Event (CE) to develop future (circa 2035-2040) SOF applications utilizing Quantum Computers, Sensors and Communications Systems by leveraging academic and commercial first movers and fast followers.

Event Outcomes

- 7 Government representatives participated in person
- 4 National Lab representatives from 2 National Labs attended in person
- Participants defined each topic and discussed current limitations and ways to overcome limitations
- Problem statement(s) were developed to frame stakeholder needs. Outcomes from the Government and National Labs Only Collaboration Event will shape future phases of this effort.
