SOFWERX STEM Showcase 2024

10 May 2024

SOFWERX, in collaboration with USSOCOM, Industry Partners, local Universities, Colleges, and Trade Schools hosted a 1-day STEM Showcase for high school juniors/seniors and college-age students to discover the "art of the possible" for education and career pathways through internships and employment opportunities.

Event Outcomes

- 68 representatives from 30 organizations exhibited their capabilities and opportunities throughout the SOFWERX facility
- Participants included 39 students, 12 Government, 80 Industry, and 4 Academia representatives
- In addition to these organizations connecting with interested students, they were also able to engage with each other and form new relationships that will hopefully inspire future collaborations benefiting the SOF Warfighter
- SOFWERX plans to host many more large-scale STEM Showcases like this in the future
