

Sea Stars STEM & Robotic End of Year Event

05 June 2024

Event Outcomes

SOFWERX, in collaboration with Hillsborough County Public Schools Sea Stars program, hosted a STEM & Robotics event. The female students were able to build robots, have a hands-on career expo, and present their STEM achievements throughout the year.

- The female students were introduced to various STEM pathways, including marine science, meteorology, and engineering through interactive sessions and displays from organizations like the National Oceanic and Atmospheric Administration (NOAA), National Weather Service, Corallo Group Engineering, and Northrop Grumman
- The event brought together a diverse range of exhibitors, including The Florida Aquarium, The Museum of Science and Industry (MOSI) Tampa, and Bits4Bots
- At the SOFWERX booth, staff showcased the importance of rapid prototyping and proof of concept in advancing technology for warfighters, emphasizing our unique contribution to national defense and innovation
